**ANNUAL REPORT 2024-2025**

## Foreword

The year 2024–25 has been one of growth, deepened impact, and renewed purpose for MOHAN Foundation. As we reflect on our journey this year, we are heartened by the milestones we've achieved—each a testament to the tireless dedication of our team, partners, and supporters across the country.

This year saw us expand our presence into new geographies, with offices established in Vadodara (Gujarat) and Agartala (Tripura). These collaborations aim to lay strong foundations for deceased organ donation and transplantation programs in regions where access has historically been limited. We also strengthened our presence in Manipur, where our team has been working closely with two key government hospitals to initiate living donor kidney transplants and facilitate deceased organ donations. This marks a significant step in expanding access to transplantation services in the Northeast region and building capacity within the public healthcare system.

In keeping with our unwavering commitment to equity and access, we have worked closely with government institutions such as JNIMS and RIMS in Manipur, and AGMC & GBP Hospital in Tripura, supporting them in initiating and strengthening their transplant programs.

Our transplant coordinators continued to serve as the backbone of our efforts—facilitating deceased donations in government hospitals such as GMCH Nagpur, AIIMS Rishikesh and NIMHANS Bengaluru with compassion and perseverance.

The National Organ Donation Helpline witnessed an unprecedented surge in calls, reflecting not only the rising public awareness but also the increasing need for trusted information, emotional support, and handholding for patients, families, and caregivers. Beyond organ donation, the helpline also became a critical conduit for coordinating corneal, skin, and body donations, affirming the trust the public places in us.

As we move forward, we remain anchored in our mission—to build a compassionate ecosystem where organ donation is understood, respected, and acted upon. Our work is far from over, but with each passing year, we move a step closer to a future where no life is lost for want of an organ.

Thank you for walking this journey with us.

**– MOHAN Foundation Team**

## BOARD OF TRUSTEES

**Dr. Sunil Shroff**  
Founder & Managing Trustee  
Consultant Urologist  
& Transplant Surgeon

**Dr. T. K. Parthasarathy**  
Pro-Chancellor  
Sri Ramachandra Medical College  
& Research Institute

**Dr. Georgi Abraham**  
Consultant Nephrologist &  
Founder Trustee -  
TANKER Foundation

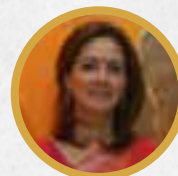

**Dr. George Kurian**  
Prof & HOD

# MOHAN FOUNDATION GETS RECOGNIZED

## Honours & Milestones

### Dr. Sunil Shroff Receives “For the Sake of Honour” Award

On April 12, 2024, Dr. Sunil Shroff, Founder of MOHAN Foundation, received the “For the Sake of Honour” Award from the Rotary Club of Madras Metro for his exceptional service to society. The award was presented during the Spirit of India Awards at the Madras Management Association.

### ‘Happy Endings’ Podcast Wins Bronze at Golden Mikes Awards

MOHAN Foundation's Spotify podcast Happy Endings won the Bronze at the Golden Mikes Radio and Audio Awards on June 26, 2024, in the ‘Best Single Commercial: Pharmaceutical, Healthcare, and Wellness’ category. Created with Bhopuwala Creative Solutions, the podcast shares inspiring stories of organ recipients.

### NGO Appreciation Award for MFJCF by Government of Rajasthan

On August 2, 2024, MOHAN Foundation Jaipur Citizen Forum (MFJCF) received the NGO Appreciation Award from the Rajasthan Government for its outstanding work in promoting deceased organ donation across the state.

### MFJCF Honoured at 14<sup>th</sup> Indian Organ Donation Day

On August 3, 2024, MFJCF was honoured under the ‘Supportive NGOs’ category at the 14th Indian Organ Donation Day by NOTTO, recognizing its key role in promoting organ donation in Rajasthan.

### Rotary Vocational Excellence Award for Ms. Jaya Jairam

On January 18, 2025, Ms. Jaya Jairam, Project Director at MOHAN Foundation and a kidney recipient, received the Rotary Vocational Excellence Award for her advocacy in organ donation and support for underprivileged patients.

### Veena Wathore Felicitated on International Women’s Day

On March 8, 2025, Veena Wathore, Project Manager at MOHAN Foundation Nagpur, was felicitated by BANAI (Dr. Babasaheb Ambedkar National Association of Engineers) for her efforts in promoting organ donation in government hospitals.

# IGNITING AWARENESS INSPIRING ACTION

## Organ Donation Awareness Initiatives

### Fundraising and Awareness Galas

To support *Anudaan: Making Transplants Affordable*-a program that funds transplants for children from underprivileged families-a soulful **Sufi Musical Night at Samarthan** with **Dhruv Sangari** was held in Delhi in 2025. Alongside heart-touching music, the evening honoured organ donors and recipients, who were felicitated on stage, and featured the powerful Life Before Ashes installation. The event was attended by over **250 people**, including medical professionals and transplant recipients.

Two charity **golf tournaments**-held in **Chennai in September 2024** and **Hyderabad in February 2025**-brought together sports enthusiasts, philanthropists, and members of the transplant community for a cause that goes beyond the game. These events served not only as fundraisers but also as powerful platforms to raise awareness about organ donation.

Among the many inspiring participants were transplant recipients **Mr. Karhun Nanda** and **Mr. Amit Prasada**, whose presence on the course was a poignant reminder of the life-saving potential of organ transplants. Their stories of resilience and renewed life deeply moved attendees, reinforcing the importance of organ donation and its far-reaching impact.

Through the shared spirit of sport and generosity, the tournaments fostered a sense of community and hope-celebrating second chances and the gift of life.

## Community Engagement and Outreach

On March 14, 2025, **MOHAN Foundation**, in collaboration with the **Department of Community Medicine, SRIHER (Sri Ramachandra Institute of Higher Education and Research)**, organised a vibrant community event in Chennai as part of the **6th “Azhiyadha Kolangal” Rangoli Competition**. Blending culture with health awareness, the event featured Rangoli and poster contests, followed by organ donation talks, engaging over **100 community members** and **20 teams**.

In June 2024, **“METRO RETRO - Ramp Walk for a Cause”** was held at Ameerpet Metro Station, Hyderabad, to mark 27 years of MOHAN Foundation. Twenty-seven celebrities joined the campaign to promote organ donation, with actor Vishwak Sen pledging his organs in front of over 500 attendees - a powerful moment underscoring the impact of public commitment.

## Spreading The Message Through Sport Events

**MOHAN Foundation** actively participated in multiple sporting events to promote organ donation and raise funds. In February 2025, at the **Run for Life in Proddatur, Andhra Pradesh**, over **2,000 participants** were sensitised about organ donation, with **MLA Sri Varda Rajulu** pledging her organs.

A month earlier, staff and volunteers ran the **Tata Mumbai Marathon** to support Anudaan and spread the message: **“Donate Organs, Save Lives.”**

At the **National Transplant Games 2024** in Mumbai, held in December, **MFJCF Ambassadors** and 19 transplant recipients showcased the power of second chances, winning nine medals and inspiring many.

In August, nearly **1,000 runners**, including differently-abled participants, joined the **Tamil Nadu 10K Run** at Besant Nagar, further strengthening the call for organ donation.

Run for Life

Tamil Nadu 10K Run

Tata Mumbai Marathon

National Transplant Games 2024

## Public Displays and Installations

To mark **World Organ Donation Day** (August 03, 2024), **MFJCF** illuminated Jaipur's iconic landmarks—**Hawa Mahal**, **Albert Hall**, and the **Bharat Jodo Flyover**—in green, symbolising hope and honouring organ donors.

In a powerful visual tribute, **Chennai's Ripon Building** and **Goa's Atal Setu Bridge** also glowed green, urging citizens to support organ donation.

Meanwhile, the **Life Before Ashes** exhibition at **Medanta The Medicity**, Gurugram, featured hauntingly beautiful organ models crafted from ashes—offering a meditative and moving reflection on the life-saving impact of donation.

## Campaigning for Awareness

In July 2024, medical students from **IGGMCH**, Nagpur, performed a street play titled “**Avayavdaan hi Shreshtadaan hai**” before an audience of 200—prompting six young attendees to register as organ donors.

On **World Kidney Day** (March 2025), the Foundation partnered with **Kidney Joy Ride Goa**, a ferry ride for patients followed by talks on kidney health. During **Goa Carnival 2025**, organ donation awareness took to the streets. Besides the float for organ donation awareness in four cities in Goa, flyers were distributed engaging over 40,000 people.

At the **Jaipur Literature Festival 2025**, **MFJCF** continued its awareness drive with an engaging stall that drew over **1,500 visitors**, using interactive tools like a letter-writing activity to encourage family conversations around organ donation.

## PUBLIC EDUCATION GALLERY

On September 17, 2024, India's first female racing champion Alisha Abdullah visited MOHAN Foundation to pledge for organ donation

Mr. Neetin Verma Supporting The Cause, On October 20, 2024, MOHAN Foundation (MF) Took Part In The 19th Edition Of The Vedanta Delhi Half Marathon (VDHM) At Jawaharlal Nehru Stadium, New Delhi

Ms. Jaya with the Principal of Oberoi International School, Mumbai, during the Organ Donation Awareness Programme on October 16, 2025

MF team with runner Mr. Jason Moses at the 19th Vedanta Delhi Half Marathon, held at Jawaharlal Nehru Stadium, New Delhi. MF joined the event on October 20, 2024, to raise awareness about organ donation

On April 13, 2024, Jeppiaar College hosted Thamizhi, a cultural event with Rotaract Clubs from 22 colleges. Students formed an eye symbol to show support for eye donation

Roaring Riders, a Jawa Bikers Club, came together to show their support for the cause of organ donation on the occasion of International Women's Day

Cyclothon 2024 - Pedal for Life was organized by MOHAN Foundation at Bayer Circle, Thane, Mumbai on December 8, 2024

Organ donation awareness talk at the Fire Station, Manimajra, Chandigarh on April 11, 2024

On August 3, 2024, MOHAN Foundation partnered with AIIMS Rishikesh to mark the 14th Indian Organ Donation Day. The event honored organ donors and raised awareness about the cause.

# CREATING ORGAN DONATION ADVOCATES

## Power In Every Voice

MOHAN Foundation's Organ Donation Ambassador Training Program is built on a simple yet powerful belief-that anyone, regardless of age or background, can be a catalyst for change in how society views organ donation. These dedicated volunteers, both young and old, undergo a structured training program that equips them not just with knowledge about organ donation and transplantation, but with empathy, gratitude, and the confidence to speak publicly on this life-saving cause.

### Module 1

Gift of Life -  
One-day  
Certificate  
Course on Organ  
Donation

### Module 2

Activity based,  
interactive  
session  
on zoom

### Module 3

Activities to  
raise awareness  
and  
funds

### An Ambassador Speaks:

“Having completed the **Organ Donation Ambassador Training in Chennai**, I feel a renewed sense of purpose and a deeper understanding of the donation process and its life-saving impact. The Module 2 session, with delegates from across India, was particularly enriching-it offered thoughtful guidance on how to effectively serve as an ambassador for this vital cause.

As I move forward, I hope to strengthen my confidence in navigating sensitive conversations around donation and in responding to doubts or concerns with empathy and clarity. My sincere commitment to helping others through organ donation will continue to guide my efforts in raising awareness and inspiring more people to say “yes” to giving the gift of life.”

**Anood Jafar**  
Prasanna School of Public Health,  
Manipal Academy of Higher  
Education

During the reporting period, **137 Ambassadors** were trained nationwide, with **30 of them actively leading 85 awareness initiatives**. These included talks, rallies, information desks, street plays, competitions, social media campaigns, and participation in marathons across eight states-Himachal Pradesh, Maharashtra, Tamil Nadu, West Bengal, NCR, Punjab, Odisha, and Karnataka. Collectively, these efforts reached 13,419 people, sparking conversations, dispelling myths, and inspiring 1,315 individuals to pledge their organs-transforming awareness into meaningful action.

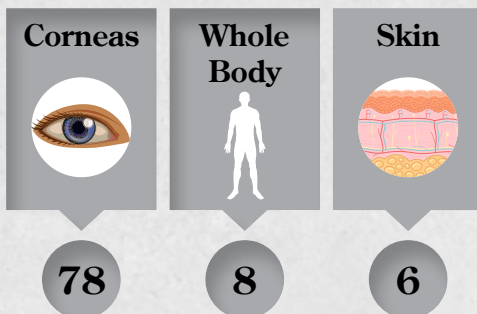

# HELPLINE FOR ORGAN DONATION

## 24 X 7 Help for Life

### Organ Donation Helpline - Turning calls into hope

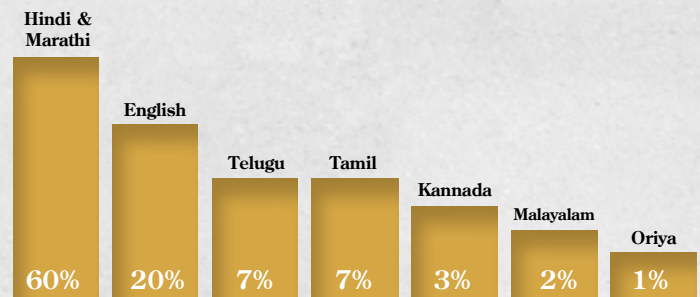

Now in its **13<sup>th</sup> year**, **MOHAN Foundation's** toll-free organ donation helpline continues to be a trusted lifeline for individuals seeking information, support, and guidance on organ donation across India. Staffed by trained transplant coordinators and committed volunteers, the helpline offers more than just answers—it provides real-time support, compassionate counselling, and crucial referrals during moments that often involve life-and-death decisions.

#### 84 Donations In This Year

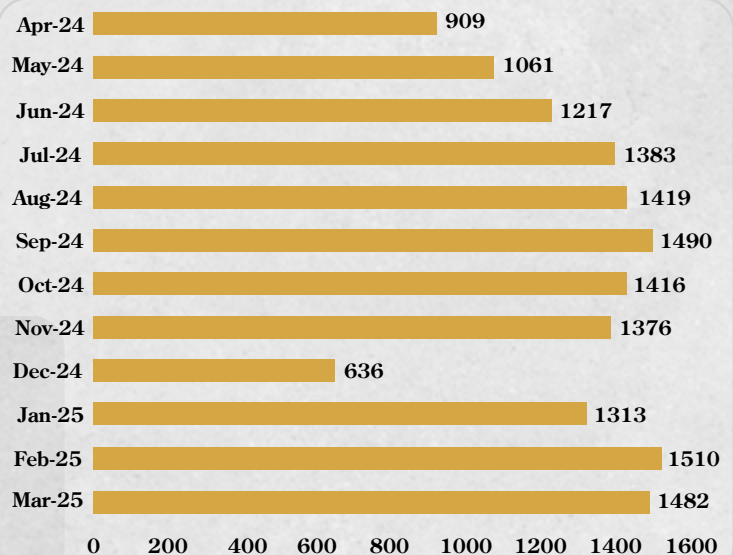

During the reporting period, the helpline responded to 15,212 calls from across the country, reflecting both the growing awareness and the need for reliable, human-centered information. Beyond answering queries, the team also played a vital role in the coordination of actual donations, guiding families through the process with empathy and professionalism.

### Language Breakup Of Calls For The Year 2024

### Helpline Calls

On the morning of May 16, 2024, young **Ishani Jain** 17 years old girl tragically passed away. In the midst of the family's grief, a neighbour reached out to **MOHAN Foundation's** 24 X7 toll-free helpline to explore the possibility of eye donation.

A trained counsellor from NCR responded to the call, patiently explaining the legal process and necessary precautions. Recognising the sensitivity of the case—it involved a suicide—the call was escalated to a senior coordinator for further support. Meanwhile, another team member based in Rishikesh followed up with the neighbour, obtained the father's contact details, and learned that while he was open to donation, the mother had some hesitation.

In a separate call, Ishani's uncle also contacted the helpline and was connected to the senior coordinator. The father, though overwhelmed with grief, expressed a heartfelt wish to donate Ishani's corneas so that someone might see the world through her eyes.

The body was still at the hospital mortuary, and the family had secured a waiver for a post-mortem. However, the hospital resisted conducting the retrieval on-site. The eye bank team was alerted and waited outside the hospital until Ishani was brought home late that night. At 11:30 p.m., her corneas were successfully retrieved at home, honouring her father's wish.

MOHAN Foundation extends heartfelt gratitude to the family for their strength and compassion, and to the eye bank team for their unwavering dedication. Their combined efforts ensured that Ishani's corneas were donated—bringing light to two lives and honouring her memory in the most meaningful way.

This act of generosity amidst tragedy is a powerful reminder of how organ and tissue donation can transform grief into hope and loss into legacy.

**Ishani Jain**

# CREATING IMPACT

## Through Training & Capacity Building

### Online Training Programmes for Healthcare Professionals

MOHAN Foundation introduced its pioneering Transplant Coordinators' Training Programme in 2009, marking the first initiative of its kind in India. The programme was designed to provide transplant coordinators with the necessary knowledge and skills. Initially offered through face-to-face sessions, the training was conducted across multiple regions in India and included one in Bangladesh.

From initially offering face-to-face sessions, we gradually transitioned to the online space to promote cross-border learning and provide candidates with the flexibility to learn at their own pace. This shift proved particularly valuable during the COVID-19 pandemic, as the training continued seamlessly without interruption. The online programmes were enthusiastically received by participants from various parts of the world.

The global response to the online format was overwhelmingly positive, with participants from across the world engaging with the content.

At present, two types of online programmes are offered to train transplant coordinators.

- Transplant Coordination Professional Certificate - Six weeks
- Post-Graduate Diploma in Transplant Coordination and Professional Certificate - One year

#### Transplant Coordinators Trained

(December 2009 to March 2025)

Face-to-Face - 2705

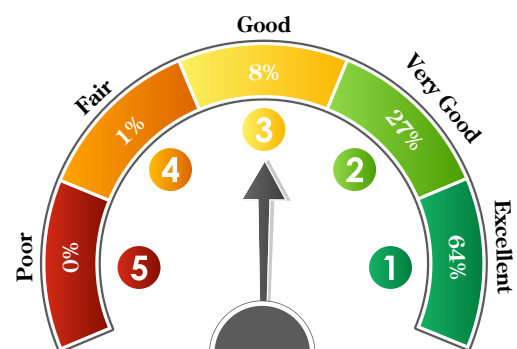

Online - 1731

TOTAL - 4436

### Testimonial

**Transplant Coordination Professional Certificate (TCPC) - December 2024**  
**Mr. Haobam Gunaremba Singh**

**Shija Hospitals & Research Institute Pvt. Ltd. Imphal**

A heartfelt kudos to the **MOHAN Foundation** for offering the **Transplant Coordination Professional Certificate** course. This exceptional online learning platform is both comprehensive and engaging, featuring a rich blend of webinars, PPTs, texts, and lectures, complemented by quizzes that helped me clarify doubts and deepen my understanding. One of the most inspiring sections is the Case Story, which motivates me to strive even harder in my role as a Transplant Coordinator. I am truly grateful to the MOHAN Foundation for delivering such insightful and informative education on organ and tissue donation and transplantation in such a short time.

## Tailor-made Online Courses

The experience also helped us design customized courses to meet the varied learning needs of stakeholders involved in the transplantation ecosystem.

### Family Counselling and Conversations on Organ Donation

20 Hours

### Legal Aspects Of Organ Donation And Transplantation

40 Hours

### Brainstem Death Identification, Certification and Donor Optimization

12 Hours

### Essential Course on Organ Donation for Medical Professionals

20 Hours

### Saving Lives - A Course For Paramedical Professionals

20 Hours

35 participants have benefited from and completed the short-term online courses designed for targeted learning

## Online Courses for General Public

A diverse set of online courses is offered to the general public, introducing the fundamentals of organ donation, transplantation, and the prevention and management of organ failure. These courses are designed not only to enhance public understanding and attitudes toward organ donation but also to empower individuals with reliable, evidence-based information about various organs-such as the kidney, liver, heart, and lungs. By making accurate knowledge widely accessible, the courses aim to build informed communities that can actively support and advocate for the cause.

## Exchange OF MoU

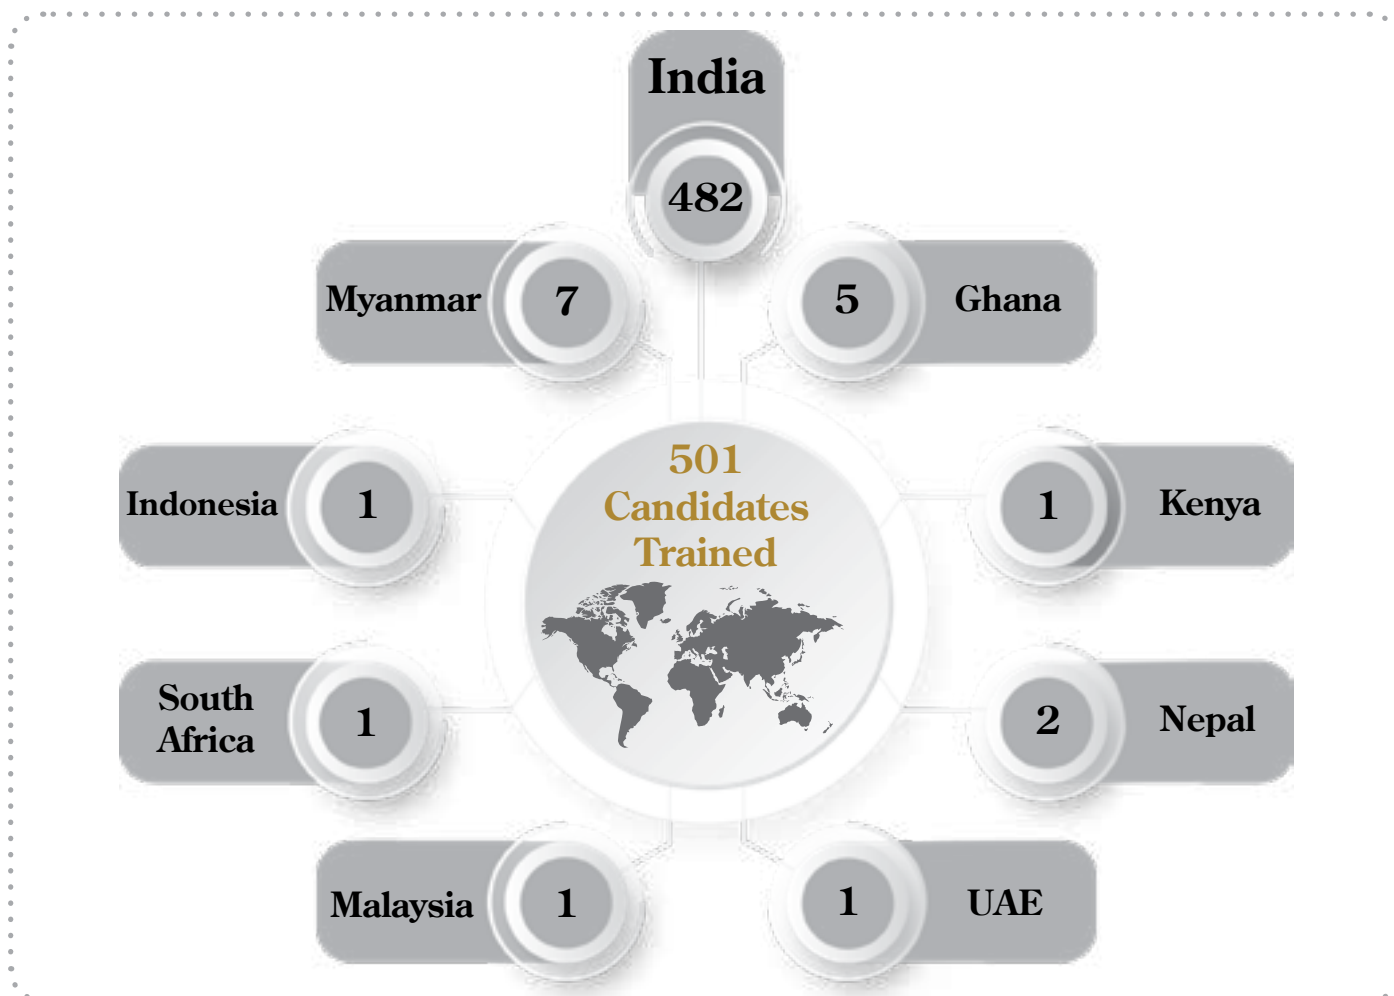

### MOHAN Foundation joined forces with Coventry University, Warwickshire NHS Trust, and University Hospitals Coventry to Advance Global Organ Donation and Transplantation

On October 16, 2024, a **Memorandum of Understanding (MoU)** was signed between **Coventry University** and **MOHAN Foundation**. This strategic collaboration aims to run educational modules in organ donation and transplantation to make it available globally and further collaborative research.

The MoU exchange ceremony was held at **Coventry University Group's India Hub** in New Delhi with dignitaries such as **Michael Houlgate** (Deputy Director India at the British Council), **Professor Nithya Krishnan** (Consultant at University Hospitals Coventry and Warwickshire (UHCW) NHS Trust), **Dr Sunil Shroff** (Managing Trustee, MOHAN Foundation), **Jonathan Young** (Chief Medical Officer, University Hospitals Coventry and Warwickshire (UHCW) NHS Trust) and many others who attended online.

## Transplant Coordinators Trained Through Online Programmes 2024 – 2025

## Workshops for Intensive Care Professionals

### ICU Workshop at Chennai - March 2025

**MOHAN Foundation**, in collaboration with the **Indian Society of Critical Care Medicine (ISCCM)**, Chennai Branch, conducted a workshop on the Role of Intensive Care in **Deceased Donation** on March 22, 2025 in Chennai, which was supported by the **TRANSTAN (Transplant Authority of Tamil Nadu)** and endorsed by the Indian **Academy of Paediatrics** - Intensive Care Chapter, Tamil Nadu Branch. 40 participants from Tamil Nadu, Goa, Andhra Pradesh, Maharashtra, and Puducherry attended the workshop, reflecting the widespread interest.

*Lamp lighting (L-R) Dr. Sunil Shroff (MOHAN Foundation), Dr. N. Gopalakrishnan (TRANSTAN), Dr. Ram Rajagopalan (SRMC), Dr. R Raghavendran (Madras Medical College), Dr. Sathya. A.C (ISCCM - Chennai Branch)*

*Brainstem Death Forms (2-4-6-8-10) - Activity*

### Continuing Medical Education (CME) at AIIMS Rishikesh - March 2025

On March 7, 2025, MOHAN Foundation, in collaboration with AIIMS Rishikesh and SOTTO Uttarakhand, conducted a one-day CME on deceased organ donation and retrieval at AIIMS Rishikesh. The event brought together approximately 60 participants, including key stakeholders from the institute - surgeons, residents, transplant coordinators, nursing staff, and eye bank personnel. The scientific sessions focused on key areas such as the deceased organ donation process, coordination with state-level organ distribution bodies, and the critical role of training and public awareness in strengthening the organ donation program.

*Ms. Pallavi Kumar (Executive Director, MOHAN Foundation) explaining the basic concepts of organ donation*

*Prof. Deepak Gupta (Professor of Neurosurgery, AIIMS New Delhi) interacting with the participants*

## Masterclasses

To foster continuous learning and deepen expertise in specialized and emerging areas of transplantation, a dynamic series of masterclasses are conducted by the Foundation in both online and offline formats. These sessions are designed to go beyond theory—offering transplant professionals, coordinators, and key stakeholders a platform for advanced learning, real-world insights, and meaningful peer exchange. Each masterclass serves as a catalyst for professional growth, equipping participants with the tools and confidence to navigate the evolving landscape of organ donation and transplantation.

Throughout the year, a number of high-value masterclasses engaged professionals across the field.

### Masterclass on “Deceased Organ Donation”

A three-day Masterclass on ‘Deceased Organ Donation’ was conducted in April 2024, at KLES Dr. Prabhakar Kore Hospital & Medical Research Centre, Belagavi, supported by the SBI Foundation. The program covered legal frameworks, communication strategies, brain death certification, approaching donor families, and handling medico-legal cases.

### Masterclass on “Living Donation Documentation - Making Transplants Safe”

A ‘Masterclass on Living Donation Documentation - Making Transplants Safe’ was organized in February 2025 at Chennai. The event provided a valuable platform for discussions, knowledge sharing, and exchange of best practices. The engaging discussions, debates, and practical insights helped participants gain greater clarity on documentation procedures and legal requirements involved in living donor transplant program. The discussion explored various aspects of altruism, accountability in maintaining an ethical program, shared responsibility in ethical practices.

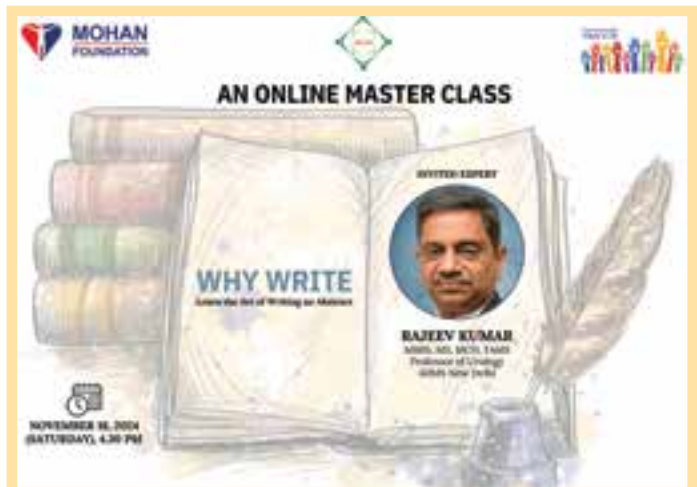

### Masterclass on “Soft Skills and Grief Counselling”

Conducted in association with Bengal Organ Donation Society & NATCO at Narayana Health RTIICS, Kolkata in May 2024. Aimed at transplant coordinators, nurses, social workers, and ICU staff, the workshop focused on enhancing communication, leadership, and team-building skills essential to strengthening the deceased organ donation program. It also equipped participants to engage empathetically with grieving families and effectively navigate the sensitive challenges of organ donation and transplantation.

## Online Masterclass Series

## 17<sup>th</sup> Annual Conference of NATCO - 'Ethics in Action'

In October 2024, MOHAN Foundation, in collaboration with the Network and Alliance of Transplant Coordinators (NATCO), successfully hosted the 17<sup>th</sup> Annual Conference for Transplant Coordinators at KD Hospital Auditorium, Ahmedabad. The two-day national event brought together leading experts, clinicians, and transplant coordinators from across India under the powerful theme, "Ethics in Action." The conference spotlighted the critical role of transplant coordinators in upholding ethical standards and driving the organ donation movement forward.

The event featured high-impact scientific sessions, alongside a vibrant free paper segment, where delegates from across the country presented podium and poster papers on a wide range of topics-showcasing innovation, research, and real-world experiences in the field of transplantation.

Swami Narayan Memorial Oration by Padmashree awardee Dr. Janak Palta McGilligan

Improving Documentation Skills: Enhancing Protective Measures for Transplant Coordinators

Session on recent trends in donations to Government Hospitals

## Advancing Skills in Liver Transplantation: A Workshop for Transplant Coordinators held in Hyderabad

Transplant coordinators, including clinical coordinators specializing in liver transplantation, were given an opportunity to improve their knowledge through a comprehensive one-day workshop under the aegis of the LTSCI Conference in Hyderabad. The workshop was organised by NATCO and MOHAN Foundation on Nov 29, 2024, at the Novotel Convention Centre, Hyderabad.

### Key Highlights of the Workshop:

The workshop covered a broad spectrum of topics and facilitated presentation and discussions amongst the transplant coordinators and experts, as follows:

- Evaluation of a liver donor
- Post liver transplant protocols
- Establishing liver transplant system in Tier II cities in India
- Documentation in international patients
- International organ allocation policies
- National State-Based Liver Allocation Practices

*Scientific sessions at the workshop*

## DICG–NATCO Round Table on Access, Justice, and Autonomy in Transplantation in India

Feb 9, 2025, Yashobhoomi Convention Centre, New Delhi

The Declaration of Istanbul Custodian Group (DICG) and the National Alliance of Transplant Coordinators (NATCO) co-hosted a round table to address ethical, structural, and social challenges in India's organ transplantation system. With insights from patient advocates, policymakers, legal experts, recipients and transplant professionals, the discussions centered on access, justice, and donor autonomy

## Strengthening Practices in Organ Donation & Transplantation: An Advanced Transplant Coordinators' Workshop

The Advanced Transplant Coordinators' Workshop, titled Strengthening Practices in Organ Donation and Transplantation, was jointly organized by MOHAN Foundation and NATCO (Network and Alliance of Transplant Coordinators) on February 9, 2025, at Max Super Speciality Hospital, Dwarka, New Delhi.

Transplant coordinators with more than five years of experience were invited to this workshop. The workshop addressed critical topics expected to shape organ donation and transplantation in the coming years.

*Dr. Thomas Mueller, Co-Chair of the Declaration of Istanbul Custodian Group, Senior Advisor Kidney for Swiss Transplant speaking on Financial Neutrality in Deceased Organ Donation*

*Intersection of End-of-Life Care, Brainstem Death, and Deceased Donation moderated by Dr. Sunil Shroff, Managing Trustee, MOHAN Foundation*

*Panel Discussion on Donation After Circulatory Death - Are We Ready*

*"I'm really grateful to be part of this workshop and to have met such dedicated people. I'm going back to Switzerland filled with energy and can't wait to share this experience with my colleagues."*

**Dr. Thomas Muller,**  
Co-Chair of the Declaration of Istanbul Custodian Group,

*"This was a highly interactive and engaging event. I commend the organizers for conducting such a well-executed workshop."*

# THE HEART BEHIND EVERY DONATION

## A True Lifesaver

The bustling city of Bengaluru, normally an epitome of vibrant energy, was ensnared in a heavy silence for the Natarajan family in the month of August of the year 2024. Their bright young daughter, Kaavya Natarajan aged barely 17, had been afflicted by a neurological affliction: a Right MCA Territory Infarct with Mass Effect causing a Midline Shift. Admitted at NIMHANS on the 19th of August, Kaavya's circumstances confused the doctors and with the surgical option presenting an outcome so dreaded to even consider, the family found that taking this sort of load was just too much for them to bear. Thus, with great sorrow, they let go of hope and refused the surgical intervention, grasping onto any form of certainty in this uncertain world.

From that moment onward, Kaavya had been slipping further away with her health. On the 22nd of August, the unimaginable happened, and she was pronounced "brain dead". This crushing statement plummeted her family deep into an abyss of sorrow. But amid their sorrow arose a spark of hope: Mrs. Ranjini was an experienced counselor. At 10:30, in the hushed environs of the Neurosurgery ICU, Mrs. Ranjini undertook to approach Kaavya's family, gently broaching the topic of organ donation and offering counsel wherein a faint glimmer of hope appeared in their otherwise overwhelming despair.

She was brilliant, selfless almost to a fault, and had impeccable taste in music. Even in death, her spirit went on touching lives. After an emotionally charged long discussion, the family finally took an almost superhuman step, being very well aware of the generous nature of Kaavya. At 1:30 pm on August 23rd, they agreed to choices of organ donation. They understood that through this last act of giving, Kaavya could give life to other beings when her own life was ended.

The first declaration of brain death came at precisely 4:27 PM on the very same day. Besides being young, there had to be two brain death declarations according to medical protocols, and the second one was duly given on the morning of August 24, 2024, at 8:10. Even as the family was running through their darkest times, they decided to use their sorrow to create light for others-who were yet to be known.

That same day, on August 24, 2024, Kaavya's organs were allocated with full respect, to make sure that through the lives she touched, some part of her would permanently remain in the world:

By transplanting the heart, this gave an 18-year-old boy a new life at Narayana Hrudayalaya Hospital.

The lungs were transplanted to a 49-year-old lady at KIMS Hospital in Hyderabad to give her a new lease on life.

Liver and Kidneys: Her Liver and the Left Kidney gave hope for a new life to a 54-year-old man whereas the Right Kidney was donated to a 30-year-old man, both at Narayana Hrudayalaya Hospital.

Her corneas continue giving vision to the recipients at Minto Hospital.

In the depth of their anguish, Kaavya's family made the biggest decision in the world, standing proof of their tremendous fortitude-the immense generosity of Kaavya throughout her lifetime. This stands as a powerful reminder unto those who think that organ donation makes some difference.

Truly, Kaavya's tale will forever inspire those who keenly feel the priceless gift of life that organ donation offers.

**Kaavya Natarajan**

## BOOSTING ORGAN DONATION

### MF's Partnerships with Government Hospitals

To enhance organ donation and make life-saving transplants more affordable and accessible, MOHAN Foundation has partnered with government hospitals across India. Through these collaborations, trained transplant coordinators are placed in hospitals to provide counselling and support to families of brain-dead patients, helping them understand the importance of organ donation and motivating them to donate. These efforts not only save lives but also build greater trust and awareness around organ donation in the community. Moreover, transplants performed in these hospitals are covered under government schemes, ensuring that patients from economically weaker sections can access treatment free of cost or at highly subsidized rates. This initiative reflects MOHAN Foundation's commitment to equity, transparency, and expanding the reach of organ transplantation across the country.

Here are some highlights from MOHAN Foundation's partnerships with government hospitals

#### MOHAN Foundation with NIMHANS, Bengaluru

Since its launch in **October 2019**, the **NIMHANS** organ donation program, with **MOHAN Foundation** transplant coordinators working in close association with the NIMHANS team, has facilitated **18 successful donations**, retrieving a total of **101 organs and tissues** - including **29 kidneys, 13 livers, 2 hearts, 4 lungs, 25 heart valves, 5 skin grafts, 22 corneas, and 2 whole-body donations**. What makes this achievement more remarkable is that NIMHANS operates as a Non-Transplant **Organ Retrieval Centre (NTORC)**.

#### MOHAN Foundation with Osmania Hospital, Hyderabad

With a long-standing partnership with MOHAN Foundation's Coordinator providing counselling support, the organ donation program at **Osmania General Hospital**, launched in December 2015, has facilitated **17 successful donations**. This has resulted in the retrieval of **34 kidneys, 17 livers, 2 hearts, 2 lungs, 26 skin grafts, and 100 corneas** from both brain-dead and cardiac-death donors, along with **32 whole-body donations**. This remarkable achievement highlights the hospital's critical role in saving lives and advancing medical research through organ and tissue donation.

#### MOHAN Foundation with Gandhi Hospital, Hyderabad

The organ donation initiative at **Gandhi Hospital** commenced in December 2015 and has since recorded **1 successful organ donation, yielding 1 kidney and 1 heart, along with 40 corneas** from brain-dead and cardiac death donors, and **12 whole-body donations**. Despite limited numbers, the hospital's efforts have contributed meaningfully to saving lives, restoring sight, and supporting medical education and research.

### MOHAN Foundation with GMCH Nagpur

Since 2019, under an MoU with the **Directorate of Medical Education & Research, Government of Maharashtra**, MOHAN Foundation has placed a transplant coordinator at **Government Medical College & Hospital, Nagpur**, to counsel families, where the TC has coordinated **18 brainstem death donations**. This collaboration has enabled **29 kidney, 16 liver, and 1 heart transplants, saving 46 lives**. In addition, the partnership has facilitated **1 skin graft, 130 corneas, and 6 whole-body donations**, making a significant contribution to saving lives and restoring health.

### MOHAN Foundation with Jawaharlal Nehru Institute of Medical Services (JNIMS), Porompat, Imphal-East, Manipur

On October 7, 2022, MOHAN Foundation, together with **JNIMS** and the **Directorate of Health Services** on behalf of the **State Medical Board**, signed a three-year tripartite agreement to strengthen the organ donation and transplantation program in Manipur. The MOHAN Foundation team worked closely with the hospital, helping to initiate the living renal transplant program, assisting in obtaining the transplant license, providing documentary support, and facilitating patient work-up. This collaboration supported the first living donor renal transplant at a government hospital in the state on **June 18, 2022**. Building on this, the first deceased organ donation took place on **August 2, 2023**, marking a historic milestone for the entire north-east region. Since then, JNIMS has conducted **62 living donor renal transplants**, including one swap, **4 deceased organ (kidney) transplants**, and **3 pairs of cornea donations**.

### MOHAN Foundation and Regional Institute of Medical Sciences (RIMS), Imphal

The MoU between **MOHAN Foundation** and **RIMS, Imphal**, was signed on **June 1, 2024**, to strengthen the hospital's organ donation and transplantation program. With support from MOHAN Foundation coordinators, the first living donor renal transplant at **RIMS was performed on August 8, 2023**. The coordinators played a key role in initiating the living renal transplant program and facilitating patient work-up. Since then, a total of **6 living donor renal transplants** have been successfully conducted. The collaboration has also focused on promoting deceased organ donation through awareness campaigns, sensitizing various departments within RIMS, and conducting community outreach programs, thereby advancing organ donation and transplantation across the region.

# EMBARKING ON A NEW JOURNEY

## MOHAN Foundation in Tripura

Following the success of its initiative in **Manipur**, **MOHAN Foundation** extended its efforts to another northeastern state - Tripura, aiming to support the state in launching a deceased organ donation program.

**January 28 to 30, 2025** - A team from the MOHAN Foundation, comprising **Dr. Sunil Shroff (Managing Trustee)**, **Ms. Pallavi Kumar (Executive Director)**, **Ms. Laishram Monica Devi (Programme Officer)** and **Prof. Deepak Gupta** from **AIIMS Delhi (Department of Neurosurgery)**, visited Tripura. The primary objective of the visit was to assist the state government in initiating a deceased organ donation program by conducting a series of discussions, workshops, and meetings with key stakeholders.

Picture 1 - Ms. Pallavi Kumar emphasizing the need of consent during her presentation

**January 29, 2025** - The first-ever “**Strengthening Organ Donation & Transplantation**” workshop in Tripura was inaugurated by **Dr. Sankar Chakraborti, Medical Superintendent** and **Head of AGMC & GB Pant Hospital**. **Shri Gitte Kirankumar Dinkarrao**, Secretary of the **Health & Family Welfare Department, Government of Tripura**, addressed the audience, reiterating the state's commitment to enhancing healthcare services and expanding transplant infrastructure. A panel discussion titled “**Deceased Organ Donation in Tripura: The Way Forward,**” moderated by Dr. Shroff, facilitated an open exchange of ideas among the 60 attendees, including healthcare professionals, law enforcement agencies, police officials, and media representatives. Discussions centered around the challenges and potential strategies to establish a robust deceased donation system in the state.

Deceased donation pathway activity being conducted by Dr Sunil Shroff

**January 29, 2025** - A high-level meeting was convened at the **Chief Minister's War Room**. The meeting, chaired by the **Hon'ble Chief Minister of Tripura, Dr. Manik Shah**, included key government and healthcare stakeholders. **Shri Gitte Kirankumar Dinkarrao**, Secretary of Health & Family Welfare outlined the healthcare infrastructure in Tripura and its strategic connectivity, highlighting its readiness to expand organ donation initiatives. **Dr. Sunil Shroff** presented a detailed roadmap focusing on training, infrastructure development, and public awareness campaigns critical to the program's success. Expressing strong support, **Chief Minister Dr. Manik Shah** emphasized the urgent need for such a program and assured full backing from the government.

# PATIENT SUPPORT GROUP: TRIOMPH

## Struggle to Strength

TRIOMPH (Transplant) is dedicated to transforming the lives of organ failure patients and transplant recipients by championing patient empowerment, education, support, awareness, and advocacy. It aspires to be a trusted, nationally recognized voice for those awaiting transplants, those who have received them, and the families and caregivers who walk alongside them.

Throughout the year, TRIOMPH led a range of high-impact educational, counselling, and advocacy initiatives, equipping patients and their families with knowledge, confidence, and a sense of community. These efforts aimed not only to support individuals on their transplant journey but also to foster a more informed, inclusive, and patient-centered transplant ecosystem.

## Webinars

**Keeping Your Liver Healthy (July 27, 2024)**, featured Dr. Naimish Mehta, a leading liver transplant surgeon, and was moderated by TRIOMPH member Ms. Poonam Sharma. Dr. Mehta demystified liver health issues, emphasized early screenings, and promoted healthy lifestyle choices. The webinar reached over 800 participants via Zoom, YouTube, Facebook, and Instagram.

*Dr. Naimish Mehta explaining about Burden of Liver Disease*

### **Mental Health Awareness Workshop (March 22, 2025)**

moderated by Jaya Jairam, Ms. Aashritha Mathur, the expert speaker tackled stigma around mental health among transplant coordinators and recipients. Attended by 40 participants, it fostered conversations around emotional well-being and self-care among transplant recipients and coordinators.

### **Support Group Meetings:**

In partnership with Nephroplus, India's leading dialysis chain, a virtual session titled Kidney Transplant – A Gift of Life was conducted on August 18, 2024. A kidney recipient herself, Jaya Jairam shared her personal transplant journey. Alongside a live donor story, the session addressed common concerns among dialysis patients, reaching over 600 people online and directly engaging more than 50 participants.

*Mr Kamal Shah discussing about kidney transplant with Mr Anant Anekar and Ms Jaya Jairam*

## Distribution of 'FAQs on Kidney Transplant' (Tamil)

Ms. Usha Balasubramanian also distributed the 'FAQs on Kidney Transplant' booklets, printed in Tamil, to around 38 patients.

**Face-to-face counselling at dialysis centres** in Chennai, were conducted by TRIOMPH's Ms. Usha Balasubramanian, reaching over 65 dialysis patients at TANKER Foundation's Chinna Porur Unit, with personalised advice on fitness, diet and transplant preparedness.

**Storytelling campaigns on Social Media** were organized around Mother's Day, Father's Day, and Rakshabandhan, curated by Ms. Poonam Sharma. These campaigns featured touching donor-recipient stories, which were shared across MOHAN Foundation's social media platforms, reaching over 9,000 people cumulatively.

### Mother's Day Special: Stories of Love & Hope

**Amulya's Mother Donated A Portion Of Her Liver To Amulya**

**Laxmi Ahire Donated A Kidney To Her Son, Rushikesh**

**Kirti Rao Paid Tribute To His Mother Late Mrs. Padma Rao's Whose Skin Was Donated**

### Father's Day Special: Fathers Are Ordinary Men Turned By Love Into Superheroes

**9-Year-Old Ishaan Who Received A Kidney From His Hero – Anant**

**Vipin Joshi And His Father Shri Murali Joshi Who Gave Him A Kidney**

**A Man's Daughter Is His Heart: Mythri Received A Kidney From Her Father Mukunda**

### Rakshabandhan Special: Reinforcing the Lifelong Bond

Umesh received a life-saving liver transplant from his sister Sangeeta and is now an avid runner and cyclist.

**Mr. Umesh Received A Life Saving Liver Transplant From His Sister**

**VLog on Managing Dialysis While Travelling:** A video log created in October 10, 2024 featuring Mr. Kamal Shah of Nephroplus offered advice on Managing Dialysis While Travelling including travel precautions, hydration needs and vaccinations. With over 133 online views.

With these efforts, TRIOMPH reaffirmed its commitment to patient education, compassionate support, and driving systemic change.

*Snapshot of Mr. Kamal Shah\_s Vlog*

# ANUDAAN MAKING TRANSPLANT AFFORDABLE

## Supporting Transplant Empowering Dreams

Launched in 2021, Anudaan - Making Transplants Affordable is a flagship initiative that reflects MOHAN Foundation's unwavering commitment to equity in healthcare. The program provides partial financial support to economically disadvantaged patients (with a focus on children), bridging the critical gap created by the high cost of transplants in private hospitals and the limited availability of services in the public sector.

By working in close partnership with hospitals and grassroots NGOs, Anudaan directly reduces the financial burden of transplantation, offering real hope to those who might otherwise be denied a second chance at life. It is not just a funding initiative—it is a lifeline for the most vulnerable.

### BEYOND SURVIVAL: Enabling Dreams Through ANUDAAN

#### **Baby Krisha Brahma – A Second Chance**

One-year-old Krisha from Udalguri, Assam, suffered from chronic liver disease. Her father, a schoolteacher, struggled to afford the ₹18.5 lakh transplant. With support from Anudaan and its partners, Krisha received a successful transplant on May 13, 2024.

“MOHAN Foundation didn't just guide us—it gave us hope. Its support changed the course of our journey.”

-Mr. Horesh Brahma, Father

#### **Master Aryan Jagtap – From Crisis to Possibility**

Aryan, aged four from Solapur, Maharashtra, needed a liver transplant his farmer father could not fund. After his mother was identified as a donor, Anudaan enabled the ₹12.5 lakh procedure, completed successfully on May 24, 2024.

“Thanks to foundations like yours, my child got a second chance at life—free of cost.”

- Mr. Anil Jagtap, Father

#### **Master Adideb Payal – A Future Rekindled**

Diagnosed with a critical liver condition at 5.5 months, Adideb was brought from West Bengal to Bengaluru by his father, who left his job for the treatment. With his mother as the donor and Anudaan's support, Adideb underwent a successful transplant on March 12, 2025.

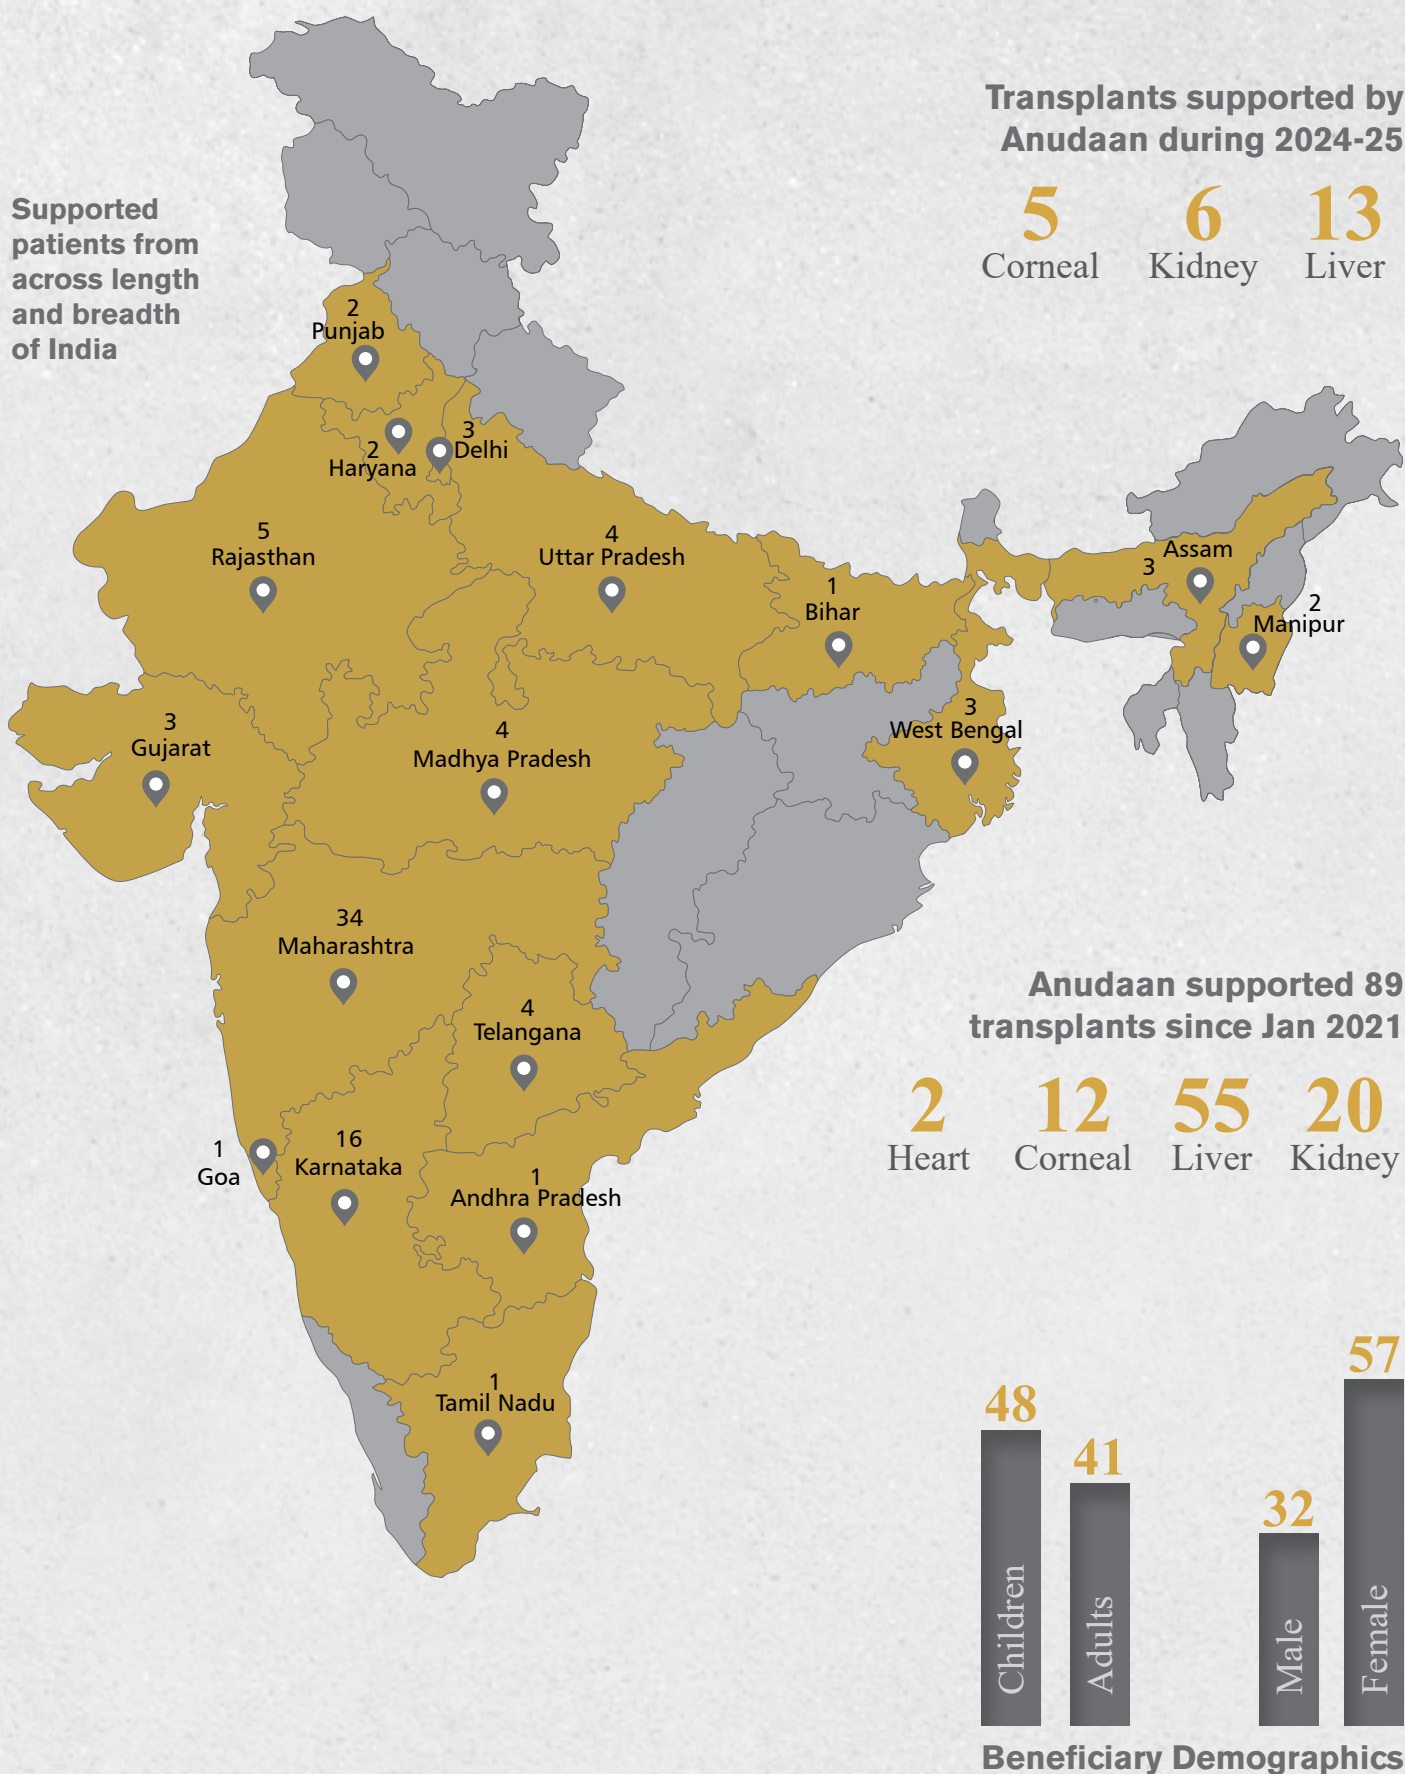

“We are forever indebted to you for your kindness and help.”

- Mr. Amit Payal, Father

## Cumulative Impact (Jan 2021 – March 2025)

Anudaan has supported **89** patients across India, disbursing over **₹3.8 crores** in financial aid to make transplants possible for the underprivileged.

# ACADEMIC FOOTPRINTS

## Our research, Our publications, Our impact

### Indian Transplant Newsletter (ITN)

First published in 1998, the Indian Transplant Newsletter (ITN) continues to serve as an authoritative publication for the transplant community, providing timely updates on national and international developments in organ donation and transplantation. It plays a crucial role in documenting the progress of India's deceased donor program and sharing insights from experts in the field. Guided by a distinguished editorial and advisory board, ITN reaches a wide audience of clinicians, healthcare professionals, and stakeholders. In the reporting year, **Volume 23** was successfully completed with the release of four issues, strengthening its commitment to knowledge sharing and collaboration.

### Research Papers

### A Landmark Achievement in Manipur: First Deceased Organ Donation Through Public-private Partnership in the North East

**Sunil Shroff, Pallavi Kumar, Kangjam Sholay Meitei.** A Landmark Achievement in Manipur: First Deceased Organ Donation Through Public-private Partnership in the North East.

Indian Journal of Transplantation 18(3):p 229-230, Jul-Sep 2024.

### Revolutionising Organ Transport: The Advent Of Drone Delivery Systems For Organs

**Jairam Jayalakshmi, Shroff Sunil, Rajagopal Prabhu, Arora Neha, Kumar Aishwarya, Kanvinde Hemal, Chandrasekar Ganesh, Raghuram Lalitha, Kumar Pallavi**

This pioneering study on drone-based organ transport, conducted by **IIT Madras** in collaboration with **MOHAN Foundation** and supported by **SBI Foundation**, was featured in the Transplantation journal in September 2024. The article was authored by **Jaya Jairam, Project Director**, MOHAN Foundation Mumbai. The study offers a promising alternative to green corridors, aiming for safer, faster, and more reliable organ delivery in India.

### Beyond the First No: Learnings from India

**Ms. Pallavi Kumar** and **Dr. Sunil Shroff (Councillor, ISODP)** contributed an article to the ISODP edition of the TTS Tribune Pulse. With its current focus on Asia, this edition highlights the various initiatives undertaken by **ISODP Councillors**, showcasing their collaborations with Asian countries to advance organ donation and promote best practices across the region.

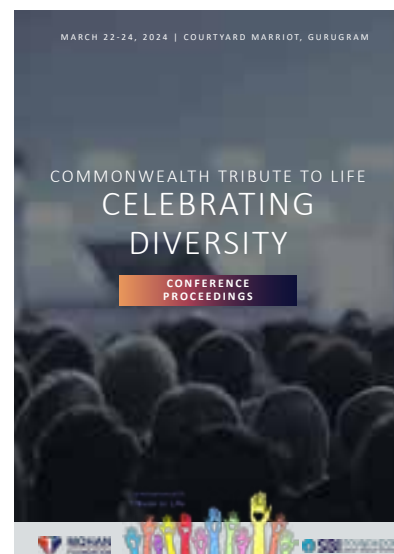

## Publications:

### Commonwealth Tribute to Life – Celebrating Diversity (Conference Proceedings)

As part of its commitment to advancing ethical organ and tissue donation globally, MOHAN Foundation hosted the **Celebrating Diversity: Commonwealth Tribute to Life (CTtL) Conference** from **March 22–24, 2024**, in **Gurugram, Delhi**.

The event marked a significant milestone in the CTtL initiative, which aimed to harness the strength of Commonwealth ties to improve donation and transplantation practices across diverse healthcare systems. At the conference, there was representation from seven Commonwealth countries including **Australia, Canada, India, Singapore, South Africa, the UK, and Zambia**, along with honorary representation from the UAE. The conference served as a platform to share knowledge, highlight best practices, and foster cross-border collaboration. Supported by **NOTTO** and **NATCO**, the gathering underscored the power of unity and learning in building equitable transplant programs across the Commonwealth.

## STRENGTHENING ORGAN DONATION PROCESS Empowering Law Enforcers

Road accidents claim approximately **178,000 lives each year in India**, with nearly **60%** of these fatalities involving individuals aged **18 to 34 years**—the most productive age group. These untimely deaths, often resulting from traumatic brain injuries, can present opportunities for deceased organ and tissue donation. However, such donations are only possible with timely intervention and support from the police, who play a vital role in facilitating organ donation in medico-legal cases requiring post-mortem procedures and coordination between hospitals and investigative authorities.

Recognizing this critical role, MOHAN Foundation launched a focused initiative to educate and engage police personnel about their responsibilities and potential impact in the organ donation process. As part of this ongoing effort, **27 sensitization sessions** were conducted across **NCR, Bengaluru, Mumbai, and Jaipur**, reaching a total of **3,360 police personnel**. These sessions have not only increased awareness but also led to meaningful change—**197 police personnel** pledged to donate their organs, signalling a personal and professional commitment to the cause.

In the NCR region, these sessions have now been institutionalized as part of the monthly refresher training courses for traffic police personnel, ensuring regular and continued sensitization.

### City-wise distribution of these sessions.

City	Session		
Bengaluru	1	Mumbai	8
NCR	12	Jaipur	6

Traffic Police Headquarters, Todapur New Delhi

NRI Coastal Police Station, Uran, Navi Mumbai

## AT INTERNATIONAL FORUMS

### Nepal's First National Training for Transplant Coordinators

Held on June 24–25, 2024, marked a significant milestone in the country's transplant landscape. MOHAN Foundation, in collaboration with the **Shahid Dharmabhakta National Transplant Centre (SDNTC)** and the Ministry of Health and Population, led this landmark initiative.

The training, conducted by **Ms. Pallavi Kumar** and **Dr. Muneet Kaur Sahi**, empowered 51 healthcare professionals from 20 hospitals across Nepal with critical knowledge and hands-on skills in grief counselling, deceased organ donation protocols, and legal and ethical frameworks. This first-of-its-kind program laid the foundation for building a strong, trained transplant coordination network in the country.

### 30<sup>th</sup> International Congress of The Transplantation Society (TTS)

September 22–25, 2024, Istanbul MOHAN Foundation was strongly represented at the conference, contributing significantly to discussions on innovation and system strengthening in organ donation. **Dr. Sunil Shroff** presented the Foundation's pioneering online training initiatives and chaired a session on **Gujarat's deceased donation programme**. **Ms. Pallavi Kumar** spoke on the impact of public-private partnerships in Northeast India, while **Ms. Jaya Jairam** presented on the cutting-edge use of drone-assisted organ transport. An abstract on drone-based organ delivery was also published in Lippincott, the official journal of the **Transplantation Society (TTS)**.

### Faculty at Middle East Organ Donation Courses, Dubai

**Ms. Pallavi Kumar**, Executive Director of MOHAN Foundation, was invited as faculty for both the **1<sup>st</sup> and 2<sup>nd</sup> Middle East Ataa Al Hayat Organ Donation Courses** held in May and October 2024 at Mohammed Bin Rashid University (MBRU), Dubai. Organised by HAYAT, MOHAP, and MBRU, she delivered presentations on **"Attributes of a Coordinator"** and **"Making the Ask for Organ Donation,"** and co-moderated group workshops on the **"Family approach to organ donation"** using role play and interactive discussions.

### The Himalayan International Transplant Conference

Dec 14, 2024, Nepal **Ms. Pallavi Kumar** presented on **"Incentives on Organ Donation - A Worldview"**, exploring global incentive models-financial and non-financial-referencing practices from Iran, the U.S., Israel, Singapore, and India. The abstract was published in the conference souvenir.
